## Manufacturing Capabilities & Specialty Items

### Swaging:

American Sling Company maintains a full wire rope sling swaging shop in both Ft. Worth and El Paso with the following capabilities:

- Wire Rope Swaging - 1/4" to 2-1/2" diameter
- Rotary Swaging - 1/16" to 1/2" diameter

### Threading:

- Eyebolts, Studs, etc.
- 3/8" - 1 1/2"

---

### Spreader Bars:

We specialize in welded spreader bars made to your specifications - fully proof tested and certified. Our staff of welders are certified to A.N.S.I. / A.W.S qualification specifications.

---

### Repairs:

American Sling has a full Repair Station for hoists, clamps, and various other types of lifting devices. Our repair staff has been fully trained and most of the common repair parts are in stock for quick turnaround.

---

### Synthetic Web Sling Manufacture:

Our El Paso facility has a full Sewing Department for the manufacture of all types of Synthetic Web Slings and assemblies; stock sizes as well as specialized customer designed assemblies.

---

### Proof Testing:

In-house Proof Testing - We offer Proof Testing services for customer-furnished assemblies with full inspection, tagging and certification with testing capabilities up to 250,000 lbs. (Lucker Test Bed - Fully Calibrated and Certified)

---

Field Proof Testing (up to 200,000 lbs.) is also offered using Load Cells and Dynamometers (fully calibrated and certified) - we also can provide weights for field testing, if required. All field testing includes full inspection, tagging and certification.

---

### Training

Safety is major consideration in every situation the workplace offers. American Sling offers training to your company's employees, the benefits of our years of experience in rigging and lifting expertise. Safety training is also offered to enlighten workers, as well as supervisors, of the need to maintain a safe work environment.
